Class Ages – Just a Rough Guide

Class age ranges are just a general guideline. While most students in a class are around the same age, placements aren't based on age alone. We also look at each child's ability, learning progress, and teacher assessments. This means some students might be a little older or younger than others in the same class – and that's completely normal. The goal is to make sure every child is in the best environment for their learning and development.
